(a) Comparison with in-situ K_d
1:1
Moored surface-piercing profilers (n = 14, ratio 1.81)
Moored offshore profilers (n = 43, ratio 0.69)
Ship casts on station (n = 4, ratio 3.67)
Gliders (n = 115, ratio 2.09)
BGC-Argo floats (n = 20, ratio 0.81)
ICESat-2 photon K_{dph} (m^{-1})
In-situ K_d (m^{-1})
(b) Relationship with turbidity
Spearman ρ = +0.47 (46 stations)
Station median ± IQR (n = 46 stations)
ICESat-2 photon K_{dph} (m^{-1})
Near-surface turbidity (NTU or FNU)
